GREEN, SMART, ADAPTIVE –
ÉLETRE KELNEK AZ ÉPÜLETEK

Amsterdam Smart City
Connector of opportunities at Amsterdam

5000 innovators! Let's introduce you to: Eva

WeMakeThe.City, which I will attend), the possibility to exchange experiences and ideas and making contacts, which lead me to join the community.

Which smart city topic do you find most important?

I am personally interested in **Infrastructure & Technology**. I cannot judge which one is the most important for Amsterdam now. For us, **Mobility** and **Citizens & Living** are the hot topics.

What should the city of the future look like?

Creative, vivid, human-centric & green (in all senses).

Parallelism in Architecture, Engineering & Computing Techniques

London

Sign up   ★ Interested

The conference represents an important forum for computational and digital architecture research that reconciles parallelism in different architectural and computing discourses. It also provokes discussion in state-of-the-art themes and topics, such as high performance computing, big data, advanced systems and interfaces, ubiquitous computing, as well as advanced fabrication technologies and tectonics. The conference also includes within its scope a number of workshops and technical sessions.
